PROFILE

Software Engineer with 3+ years of experience in web application development in Japan and Malaysia. Experienced in Angular, Vue.js, Node.js, and MongoDB, with skills in frontend/backend development, screen definition, testing, and requirement clarification. Experienced in Agile/Scrum development and working with clients and design teams.

WORK EXPERIENCE

株式会社アジレット | Agile & Team (Japan) July 2024 - Present
Frontend Developer

- Developed features for a digital banking application in Japan using Angular within an Agile/Scrum development environment, covering screen definition, programming, and testing.
- Collaborated with client and design teams during screen definition and specification confirmation to clarify requirements and ensure accurate implementation.

Fusionex Group (Malaysia) Aug 2022 - Feb 2024
Fullstack Developer

Promoted from Software Engineering Intern to Fullstack Developer after a 6-month internship.

- Developed custom solution systems using Vue.js, Node.js, and MongoDB, including frontend development, backend API development, and system logic.
- Developed new features and fixed bugs based on Functional Specification Documents (FSD), ensuring implementation met specified requirements.
